Writing (max - 18)

Hi, guys! Today I ^{have been} cleaning up the garage in my house and ^{have} found my great-great-grandfather's diaries. He wrote about his days at school in 2023. I was so shocked! So many things ^{have} changed.

In 2023 he had to wear school clothes like T-shirts, jeans, shoes. Now we're wearing whatever we want, every student can look like ^{he/she} wants. I think it's great. In ^{the} schools teachers were real people, that is the most interesting thing, because now ^{there} are only robots. They can prepare lessons, ^{text} mark homework and even understand human emotions. ^{even} Robots very intelligent, but still they can't replace people. Also ^{their} books were made from ^{the} paper. I can't believe ^{this}! Of course, there were electronic books, but they were not ^{so} popular as in 2223. Now we ^{can} hardly ever ^{can} see the paper books.

To make a conclusion, I think, it's easier to study in our ^{nowadays} days than in 2023.

for the new government to make children, as the future of the country, think in the way it was appropriate for this government. That's why history teachers were lying about some historical facts and were showing the former government authorities as a bloody establishment that hadn't paid any attention to people's needs. Because of this many children were given with wrong information and any other point of view was forbidden.

Personally, my first school teacher was a very kind woman, who showed me different aspects of the world, explaining pros and cons of different actions, but she never told me how to act and what to think, that's why I consider her as the best teacher in my life.

In the end, I'd like to say that the role of a teacher in the child's life is really important, consequently, teacher is the person that should show where to look but never tell what to see.
