Writing (max - 18)

Hello, everyone!

Today, I will talk about the difference between 2023 and 2223.

I was cleaning garage when I found my great-great-grandfather's diary. It says they used to wear T-shirts, jeans and shoes at school. We don't have any necessary uniform at school, though we aren't allowed to wear pajamas there. All the teachers are robots and they are smart enough to replace a human. We don't have PE at school because it's now unnecessary as we invented magical drink that keeps you fit. We use flying cars as transport and it's safe enough to have a toddler as driver. And instead of paper we use holographic tablets. ^{those} ~~those~~ can do everything!

As conclusion, I would say that our life these days is much easier than 200 years ago because we don't have to work that hard.

Thanks for reading!
